## **Council Tours City**

**Abbotsford – May 7, 2010** – Mayor and Council toured various locations across the City at a recent special meeting of Council, announced Mayor George W. Peary today.

“This tour gave Council the opportunity to see first hand, some of the issues and areas of concern facing our City at this time,” said Peary. “There are some things that just cannot be captured to the full extend in a report and this gave us an opportunity to gain a deeper insight.”

Councillors visited areas of the City with ongoing bylaw issues, toured new development areas, as well as visiting some of the innovative businesses underway in the City.

“We had the opportunity to see first hand some of the fine work going on in our City,” said Peary. “It’s truly inspiring to see things like our new Eco Dairy and the Anaerobic Digester facility taking shape in our community.”

The tour was also an opportunity for Council to view as a group, some of the infrastructure work taking place across the City including the Clearbrook Interchange improvements, the extension of Watcom Road and the new taxiway at the Abbotsford International Airport.

Additional stops included Mill Lake Park, Discovery Trail, the Delair Park Community Garden and the new Fire Training Facility.
