Dear Owner/Occupant:

Re: Fishtrap Creek Integrated Stormwater Management Plan (ISMP)

The City of Abbotsford has engaged Kerr Wood Leidal Associates Ltd. and Piteau Associates to undertake a geotechnical/geo-hazard assessment of Fishtrap Creek and its tributaries, for a study of Fishtrap Creek ISMP.

The purpose of the ISMP is to develop an action plan for protecting and improving watershed health and addressing current issues in a watershed. The ISMP process preserves watershed health as a whole, while meeting community needs and allowing development and re-development to occur. More information can be found at www.abbotsford.ca/fishtrap.

As part of this assignment, field crew will be walking the ravine areas of Fishtrap Creek to identify erosion sites, slope stability problems, and geo-hazards. This may require the crew to briefly pass through your property as they access or walk along the ravine. The field work will take place between May 16 and May 24, 2019.

We appreciate your cooperation in accommodating this work. Should you have any questions or concerns regarding the field investigation, please contact me at 604-853-2281 extension 5391 or email kzhang@abbotsford.ca.

Sincerely,

Kathy Zhang, P.Eng.
Drainage Engineer

c: Stella Chiu, P. Eng., Senior Wastewater & Drainage Engineer, City of Abbotsford
Eva, Li, P. Eng., Project Manager, Kerr Wood Leidal Associates Ltd.
Marianne Rosted, P.Eng., P. Geo., Senior Geotechnical Engineer, Piteau Associates
