

WATER SUPPLY SYSTEM DISINFECTANT (CHLORINE) NOTICE

This notice applies to the **existing isolated Sumas Prairie Water Distribution System** supporting the following area:

Angus Campbell Rd to the west, Hwy 1 to the north, Chilliwack/Abbotsford border to the east, and Canada/US Boarder and Old Yale Rd to the south

As of Wednesday December 8 at 8 a.m., the disinfectant in the Sumas Prairie drinking water system will temporarily switch from chloramine to chlorine. This is an important step in restoring the Sumas Prairie water system following the flooding event and is expected to be in place for several weeks. During this time, you should not notice any significant changes other than a slight increase in chlorine odour. Please note that this water system is still under a **Do Not Use (Flush Only) Advisory** until further notice. All other water in the City of Abbotsford remains safe to use.
